VOLUME 33: No. 41

Authorized as Second Class Mail, Post Office Department, Ottawa
ACME, ALBERTA, THURSDAY NOVEMBER 18th, 1954

\$1.50 a Year; 5c a Copy

Mr. and Mrs. Jack Barnes and children left Wednesday to spend the winter in Vancouver.

We are pleased to report that Mrs. Miller, wife of Rev. Miller, is convalescing at home after her recent operation.

Mrs. S. Cadman and Mrs. M. Levins of Drumheller were weekend visitors at the home of Mr. and Mrs. C. Cave.

Miss Laura Miers was a weekend visitor at the home of her sister and brother-in-law, Mr. and Mrs. Teddy Ohlhauser.

Mr. and Mrs. Morris Switzer of Calgary, formerly of Carbon, were holiday visitors at the home of Mr. and Mrs. Francis Poxon. Nice to see you, Alice and Morris.

Mrs. Joyce Regamble and Terry, and Jimmy Cooper of Banff spent the holidays at the home of their parents, Mr. and Mrs. James Cooper.

Paul Perman and George Bacon of Hesketh met with an accident on Monday evening on the north road home. Both were taken to Drumheller hospital with bruises and shock.

LOST—Two Steers, coming 2 yrs. old. White faces, Red right ear cut off. Reward.
—Alf Hovik, phone 56, Carbon

PULLETS FOR SALE—Ready to lay.
—Apply J. Ried, Phone 53, Carbon.

Order Your Christmas Turkeys Early. Come and take your choice A1 birds.
Apply J. Ried, Carbon phone 53.

FOR SALE—Dormeyer Food Mixer, stand, beaters and attachments. \$20.00.
—Apply Mrs. E. Graff, Carbon Phone 702.

Miss M. Mundle of Howarden, Sask. is spending a short holiday at the home of her brother-in-law and sister, Mr. and Mrs. Harry Holstein.

Mr. and Mrs. Harry Hunt, Mr. and Mrs. Waldron left on Wednesday for Saskatoon to attend the Wings Parade to be held on Thursday. Howard Hunt, formerly of Carbon, is one of the graduates.

Mrs. A. McMurray, formerly Miss Muriel Dixon of Carbon, is the proud mother of Princess Wendy McMurray, 14 months old who won a silver loving cup as princess of Calgary in her age class B Group sponsored by the Knights of Pythias in Calgary on Oct. 25.

ANGLICAN NOTES

Christ Church, Carbon
Sunday, November 28th
Holy Communion at 9:30 a.m.
Sunday, December 5th
Morning Prayer (Family Service) at 11:00 a.m.
Church School Saturdays at 3:00 p.m.

CHANGE OF TIME

Please note the change of time of the service on November 28th to 9:30 a.m. This is necessary to enable the visiting minister and the Vicar to complete the services for that day before evening. The visitor will come from Calgary and will probably be Rev. G. W. Parker who assists the Dean at the Cathedral. The Vicar has to take the evening service at Drumheller on that day.

DIOCESAN MAGAZINE

There has been a mysterious breakdown of the mailing system. All magazines were mailed on

time from Calgary, but enquiries have shown that some have disappeared. Duplicate copies have now been mailed where the names were known, but if there are any others who failed to receive a copy and who sent in their envelopes in good time, please contact the Vicar.

W.A. BAZAAR

We would like to thank all who gave of their time and efforts to make the Bazaar held on November 20th such a success. This, of course, includes all our welcome visitors, whose friendliness is much appreciated.

PROVINCIAL RECREATION INSTITUTE DECEMBER 28-30

The first Provincial Recreation Institute will be held December 28-30 at Red Deer Composite High School.

Sponsors of the three-day program are the Health and Recreation Branch of the Alberta De-

partment of Education and the Alberta Recreation Association.

Any person providing leadership in the organization or instruction of recreational activities may attend the Recreation Institute but applications for registration must be made as soon as possible since accommodation is limited.

The program will include workshops, panel discussions and lectures on program planning, school facilities for recreation, camping, training and placement of volunteers, publicity and public relations and other topics of value to recreation leaders. Recreation leaders will also take part in such activities as crafts, dramatics, coaching, group singing, social recreation, modern dancing.

Applications should be sent to the Health and Recreation Branch Department of Education Administration Building, Edmonton.

I'M
TALKING TRUDY
THE DOLL THAT TALKS
... in RHYME!

Yes, Talking Trudy is always ready to say her piece! "Mary had a Little Lamb," "Rock-a-Bye Baby," "Pussy Cat, Pussy Cat" or "Oh, where has My Little Dog Gone" . . . ask your little girl which of these four famous nursery rhymes she likes best. Trudy will recite that rhyme as often as you want. Trudy is a big, beautiful cuddly doll, all decked out in a sweet plaid pinafore and cute hooded bonnet to match. She's 24 inches tall and sturdily built to take all sorts of punishment and still talk in rhyme. There's no complicated machinery, no delicate settings to go wrong. Just turn the sturdy handle at Trudy's back and she talks in rhyme . . . every time!

HURRY! HURRY!

Don't disappoint your little girl. Make sure that she gets her "Talking Trudy" doll. ORDER NOW. Supplies are limited so don't delay and be sure to state your first, second, third and fourth choice of nursery rhymes by numbering the squares in the attached coupon.

• ROCK A BYE BABY
• MARY HAD A LITTLE LAMB
• OH WHERE HAS MY LITTLE DOG GONE
• PUSSY CAT, PUSSY CAT

Pet baby moose is big eater, likes all comforts of home

CLINTON, B.C.—Young Barney is getting downright pampered—and, brother, does he love it. And the Marvin Mayfields probably have the fastest growing family, pound for pound, in North America.

The family consists of Marv, his wife, three little girls, one little boy and one not-so-little moose, Barney.

Needless to say, the 300-pound Barney accounts for the fast-rising poundage.

Although Barney is only a youngster of six weeks, he's already established a solid beach-head in the Mayfield home.

Marv found Barney when Barney had been in this world about one week.

The little bull moose was lying alongside a road near this interior British Columbia community 200 miles north of Vancouver, too weak to stand. The mother was nowhere in sight.

Mayfield had to make a choice. Should he take the baby moose or should he leave it there to die?

Mayfield decided to take the little guy and he loaded it into his truck. At home, Mayfield and his wife first fed Barney with a bottle and then from a bucket.

Now Barney is just like one of the family and like the Mayfield children he is right positive he has full access to the Mayfield home.

Sofa-loving moose

He's a kitchen-raider from the word go. And he's the dog-gone . . . moosiest hog of the frontroom davenport.

He eats anything he can lay a tooth to in the kitchen. The davenport is the next stop, sort of an after-breakfast nap you might say.

Barney, despite a penchant for pancakes and pancake batter, is rather particular about his eating habits. No hay for Barney, like any old ordinary woods moose.

He really goes for milk. He guzzles six gallons a day.

Mayfield has a fenced-in pasture near the house and that's where Mayfield will try to keep Barney when he grows horns.

Warm weather speeds Alberta harvesting work

EDMONTON. — Warm, dry weather of the last couple of weeks has provided ideal threshing conditions and rapid harvesting progress is reported in almost all areas of Alberta. R. E. English, statistician for the provincial department of agriculture, reported recently.

At Olds, Stettler, Lacombe, Ponoka, Edmonton, Westlock, Smoky Lake and Bonnyville districts five to 20 percent of oats and wheat were reported threshed at the weekend. In the south operations are nearer completion. Moisture in the fields still is hampering some cutting.

In the north, progress varies from two-thirds completed north of the Peace river to about one-third south of the river.

"Yields appear satisfactory in view of the condition of the crop at the time killing frosts occurred," Mr. English said. "Farmers are obtaining as much or more grain than expected at Sept. 20. But many fields of late oats and barley will not be threshed."

Quality is low with wheat grades in the south averaging No. 2 and 3 northern and in some districts east of Lethbridge oats and barley will grade above feed in northern parts of the Peace River district there is a little No. 2 northern and a great deal of oats and barley will rate C.W. grades.

In most other areas," he added, "most reporters suggest that wheat grades will average five or six and that oats and barley will fall almost equally into one and two feed with some three feed."

Patterns IRON-ON DESIGNS IN 3 COLORS

by Alice Brooks

No embroidery! No appliques! Just a stroke of an iron puts delicious strawberry motifs on household linens, clothing or curtains! The leaves are a rich green—the blossoms a sunny yellow—the berries a deep red! In a jiffy—beautify your home!

Jiffy! Iron-on color! Washable! Pattern 7118 has 10 strawberry designs: four, 3x2; four, 4½x3 inches; two borders, 1½x12.

To obtain this pattern send twenty-five cents in coins (stamps cannot be accepted) to:

Department P.P.L., Household Arts Department, 60 Front Street W., Toronto. Be sure to write plainly your Name, Address and Pattern Number.

Brimful of thrifty gift ideas . . . our Alice Brooks Needlecraft Catalog . . . 82 of the most popular embroidery, crochet, sewing, color-transfer designs to send for. Plus 4 patterns printed in book. Send 25 cents for your copy. Ideas for gifts, bazaars, fashions.

Retirement at 65 scored by doctor

VANCOUVER.—A top medical expert on old age said too many Canadian workers are being forced to retire at 65, regardless of their mental and physical abilities.

Dr. Ian Macdonald, chief of medical services at Toronto's Sunnybrook Veterans' hospital and a member of the medical faculty at the University of Toronto, said:

"It's bad for the individual and bad for the community if an able-bodied man is forced to retire simply because he has reached the chronological age of 65."

"It has been proved over and over again that no people age at the same rate and there is no good reason why a compulsory retirement age of 65 should be arbitrarily laid down."

Kitchen Meditations By JANE DALE

MY MINUTES AND HOURS

I would that all the minutes which go to make up my day be good ones. So many are spoilt by my blundering, my thoughtlessness, or by my utter blindness. Another day will come and with it another quota of minutes and hours. May I, some day, keep each one shining brightly so that darkness comes they will be like as many stars in a lonely night.

A Roman senator was appointed for life unless expelled for some dishonorable cause. 3114

Weekly Tip

CANNED PRODUCTS

. . . whether in tin or glass, should be stored in a cool, dry place not exposed to freezing temperature. Freezing may cause breakage in glass and will cause a deterioration of the food product. Most products packed in glass will bleach or darken if exposed to light, so unless the storage room is dark, slip paper bags over the cans or store in the original pasteboard containers.

Swift Current Agro expert describes life in Iceland

SWIFT CURRENT.—J. B. Campbell, forage crop expert at the Dominion experimental station has just returned to Swift Current from a trip to Iceland, where he has been giving technical advice to the Icelandic government in utilizing grazing land in the country.

Mr. Campbell described much of Iceland as a large desert, with blowing sand, high mountains and glaciers.

Occupations of the country vary from fishing to big industry, he said. Mr. Campbell said that the sea was very bountiful with cod, which was one of the main fish products. Herring and haddock are also plentiful.

The pasture land is being reduced by land erosion, caused by blowing sand, Mr. Campbell said and the bad areas are being taken from production and sown to grass.

Big problem

Right now the big problem is to get enough grass. Eventually the desert land of Iceland will be transformed into areas very similar to Saskatchewan's community pastures, Mr. Campbell said.

The climate for horses, cattle and sheep is harder than that in Saskatchewan, the forage specialist pointed out. The animals are much alike in appearance to those seen in parts of Europe 1,000 years ago. The stock in most cases appeared to be a "small edition" of Canadian stock, Mr. Campbell said. In many cases weight of cattle does not exceed 750 pounds.

Found inspiration in son's letters for winning essay

VANCOUVER.—Mrs. Elizabeth Findlay, 53, searched her soldier son's letters for the background for an essay which won her a 10-day trip to Italy—where her son is buried.

Mrs. Findlay said she was "not certain" she could take the trip, which she won as second prize with an essay on "why I would like to visit Italy."

"I have always had a fondness for Italy, especially the south," she said. Her son, Tpr. James D. Findlay of the Lord Strathcona's Horse, is buried at Cassino, where he died May 25, 1944, during the march on Rome.

"I would like to see his grave and some of the things he saw," his mother said. "He wrote to me so enthusiastically after he landed in southern Italy that it wasn't hard to write my essay."

However, she said she entered the contest "on a foolish impulse" after reading of it in a newspaper. "But I don't know a soul in Italy or anyone who is going."

On the other hand, she said, her 11 grandchildren "are so enthusiastic I'm practically on my way."

The people of the country are very practical, and most everyone works. In the cities girls 12 to 16 years of age do the gardening in the parks, children from 10 to 12 years of age work in the hay fields, and operate tractors and other haying equipment with great skill.

Mr. Campbell said he was impressed with the smallness of the jails in the country, and upon delving into the matter he found that the policy was not to confine people to prison for long periods, but instead, to put into practice a program of rehabilitation.

Oldest country

Iceland is the oldest country in the western world with a representative government.

Heads of families set a tradition, which their successors follow. From these traditions have come a code that has guided the country to a free and independent state.

Mr. Campbell said that Iceland was known to Grecian explorers before the birth of Christ. Irish monks inhabited it about 700 A.D. and stayed for a hundred years. The first parliament met in 930 A.D.

Iceland is settled largely by Norwegians, because of its location, although there are plenty of people of Irish and Scotch origin too.

According to Mr. Campbell the cities of Iceland are very beautiful, and modern, and many of them are being rebuilt at the present time.

The public school course is of six years duration. Good trade schools, and places to serve apprenticeships are available and English is one of the regular subjects in the grade school.

All Can help

Canada is largely free from trouble with food or drugs which are below standard quality or otherwise harmful to health, a state of affairs which can be credited to her food and drug inspectors who not only keep an eye on domestic food and drug products but also on all such articles imported into this country. Every citizen can co-operate with this service by reporting filthy, decomposed or adulterated foods to the local food and drug inspector.

PINEX
cough syrup

Concentrate

**INSTANT RELIEF
FROM COUGHS**
due to colds

The active ingredients of time-tested Pinex cough syrup bring fast, welcome relief from distressing coughs. You save money too when you buy Pinex Concentrate. A bottle mixes with honey or syrup to make 16 ounces of pleasant-tasting cough medicine that's good for the whole family. Keep it ready for the very first sign of a cough.

At all druggists

Self-Iced SPICE CAKE

Sift 3 times, 2¼ c. once-sifted pastry flour (or 2 c. once-sifted all-purpose flour), 2½ tsp. Magic Baking Powder, ½ tsp. salt, 1½ tps. cinnamon, ¼ tsp. each of ground cloves, ginger, allspice, nutmeg and mace; mix in ½ c. seedless raisins and ¼ c. chopped walnuts. Cream ½ c. butter or margarine and blend in 1½ c. lightly-packed brown sugar; beat in 3 well-beaten egg yolks and ½ tsp. vanilla. Add dry ingredients to creamed mixture alternately with ¾ c. milk;

spread batter in greased 9" square pan lined in the bottom with greased paper. Beat stiff, not dry, 3 egg whites and a few grains salt; gradually beat in 1 c. lightly-packed brown sugar and spread over cake; sprinkle with ½ c. chopped walnuts. Bake in rather slow oven, 325°, 1¼ to 1½ hours; cover lightly with brown paper for last half hour.

Always Dependable

THE TILLERS

Inventions of Leonardo da Vinci put him centuries into future

By David A. Heller
(CPC Correspondent)

WASHINGTON—Sometimes we Twentieth Century folk may tend to feel a little smug toward the peoples of ancient times. With our "new" inventions, like the airplane, the helicopter, air-conditioning and the like, we're often sure that we must be a lot brighter than those who came before us.

An interesting antidote to this smugness is to see a collection of models made from the drawings in the notebooks of the incredible Leonardo da Vinci, who some scholars believe was the greatest genius of all time.

Just about everybody is familiar with Leonardo as a painter. His Mona Lisa is probably the most famous picture ever painted, and his The Last Supper is one of the greatest master-pieces of religious art. However, few realize that Leonardo was also the most prolific inventor who ever lived.

A glance at the exhibition will prove to you that a lot of our newest ideas aren't new at all — Leonardo put them down in quite workable form nearly five centuries ago.

You may be surprised to learn that half a century before Columbus made his fateful voyage to discover America, Leonardo da Vinci had drawn detailed and workable plans for an airplane, a parachute, also an air conditioner (which he built and which actually worked), rotating bridges, a mechanical car, a printing press with moveable type, a tank, and hundreds of other mechanical devices which distinguish our times.

Leonardo was born exactly 502 years ago in the little Italian village of Vinci. He soon attracted recognition as a great painter and was called Leonardo da Vinci (Leonardo of Vinci).

Leonardo had a scientific mind and was constantly exploring the mysteries of nature. He was one of the first painters to study anatomy, dissecting many corpses to learn all the muscles, organs and sinews of the human body. Medical students for centuries studied Leonardo's remarkably detailed sketches of the body and its various parts.

The same inquiring mind which led Leonardo to study the human body led him to explore the almost unknown science of mechanics. Machines, then little known, fascinated him. At a time when the Dark Ages were exerting their stifling influence over the minds of men, Leonardo almost alone developed many of the principles of physics and applied science upon which modern inventions depend.

He became the chief military engineer to the Duke of Milan and invented hundreds of things which advanced the art of war. One of these was a steam gun

TRY AND STOP ME!

By BENNETT CERY

Larry Gore has discovered the country's most frustrated skunk. His father left him without a scent.

Pierre Lazareff, editor of Ce Soir in Paris, summed up journalism in one sentence for a college class: "A journalist spends the first half of his career writing about things he doesn't understand, and the second half concealing the fact that he understands them only too well!"

A top-ranking TV "artiste" announced with some indignation that her press agent, she had discovered, "was the most colossal liar in seven states." "I take it," said a friend, "that you're going to fire him." "Fire him?" echoed the artiste. "I'm going to double his salary!"

An oft-married playboy suddenly bobbed up with the blondest, and most curvaceous specimen in his spectacular career. "Oh, boy! Oh, boy!" marvelled a friend. "Where did you dig up this one?" "I'm not sure," replied the playboy. "I just opened my wallet and there she was."

"Doc" Sherman tells about the youthful couple who entered his drug store in search of a potent new baby tonic. "Here's one," promised Doc, "that will make your youngster husky, handsome, and happy." "That's just what we want," said the young lady, "but who takes it, my husband or I?"

Flying machine, designed by Leonardo Da Vinci centuries ago, incorporates most of the features of the modern glider plane.

—Central Press Canadian.

Leonardo's machine-gun had three tiers of 12 barrels each. As one tier was fired, another was reloaded, a third was cooling.

which fired by allowing water to flow into the barrel of a cannon which was kept red hot. When the pressure built up, the bullet was fired.

Leonardo also built machine guns, aerial bombs, designed forts, a scaling ladder, much like those in use on today's fire engines which allowed the duke's men to get over the highest walls of his enemies' cities, a spring-driven car, which was the first known design for a self-propelled vehicle — and hundreds of other things.

Many of Leonardo's inventions had peacetime uses, too. For example, he designed one of the first two-level bridges, providing an upper level for pedestrians and a lower level for vehicles — a partial answer to Fifteenth Century traffic jams.

He designed a jack for lifting weights that isn't much different from the ones we use when our cars get a flat tire today. He designed a clock which showed the minutes as well as the hours — something that had never been done before. He made a water-powered saw, and a huge, 70-foot high pump which raised water from a stream into the Castle of Milan.

Leonardo improved the printing press. His design provided for a movable bed of type under the platen, the first time that had been done. He also built a highly successful air-conditioner for the boudoir of Beatrice d'Este, wife of his patron.

Some of Leonardo's knowledge was dangerous. He lived in an age when religious bigots felt that such discoveries were dangerous and against the will of God. Many

of his fellow scientists were imprisoned or burned at the stake and undoubtedly only Leonardo's powerful friends saved him from a like fate. For this reason, Leonardo's famous notebooks were all written in "mirror-writing," backwards. They can only be read when held up to a mirror. That kept the curious from finding out what he was doing.

— Strictly fresh —

"All dressed up and no place to go" is the way to describe one robber's girl friend. Salesman from Wauwatosa, Wis., reports \$6,000 worth of assorted women's clothes stolen from his car — all size 14.

Man in Boston, Mass., first pulled his estranged wife's hair, then two days later shaved her bald. Those new hairdos affect us that way, too, but we haven't enough gumption to do something about them.

Slightly tipsy lady in Barnwell, S.C., sideswiped a highway patrol car, the mayor's car and bounced

off a light pole, but thought she missed the jail. She was so wrong.

Drive With Care!

New armaments, propellants come under review

The most recent developments in the fields of armaments, explosives and propellants will be discussed October 18 to 29 at Quebec City when 150 scientists and service technical officers representing Canada, the United Kingdom and the United States will participate in a series of closed sessions.

The delegates, attending the sixth tripartite armaments, explosives and propellants conference, last held sessions in Canada in 1950 at Quebec City.

Dr. Ormond M. Solandt, chairman of the Defence Research Board, will welcome the visitors to Canada at Laval University on October 18. All technical discussions will be held at the Canadian Armament Research and Development Establishment, (CARDE) Valcartier, DRR's largest research laboratory, with the delegates returning to Laval University on October 29 for the closing ceremonies.

Participants will present brief abstracts dealing with research and development and the most recent instrumentation and technical advances in the fields concerned. Detailed discussions by delegates will follow.

The agenda includes tours of CARDE, Sorel Industries Limited, Sorel, the Valleyfield and St. Paul L'Ermite plants of Canadian Arsenals Limited and the Aluminum Company of Canada at Arvida.

Conference members meet every 18 months with each of the three countries acting as host in rotation.

Heading the Canadian delegation will be Dr. H. M. Barrett, chief superintendent of the Canadian Armament Research and Development Establishment.

Cat stalks and retrieves game, likes ice cream

HOUSTON, Tex.—Albert Bartay, a 58-year-old typographer, has a 15-pound cat that acts like no other cat on earth.

For instance, Toby, a four-year-old Persian and Angora combination, is a hunter's best friend. He stalks, "points" game, waits while his master shoots, and then retrieves.

"And he doesn't disturb a feather," Bartay said.

Toby has been hunting with his master for three years.

"Just show him a gun and he livens up," his master said.

Passing birds get a low growl from Toby, but nothing else seems to matter. Bartay said Toby doesn't fight or play with other cats.

"But he sure likes ice cream," the owner added. "I split a pint with him every night, any flavor—Toby's not particular."

Telegraph cables in the ocean are not suspended from shore to shore but rest on the floor of the sea, often miles deep.

New Blouses Reduce Cost of Laundering

BY EDNA MILES

DID you know that women pay more to have a blouse laundered because laundry machines are slotted to fit the buttons on a man's shirt? And women's blouses (until now) button on the left.

Newest shirt look for women is the one that has all the virtues of a man's shirt. This means it buttons on the right, has stays in the collar and gussets at the side flap. It also means that the cost for laundering a blouse can now be the same as that for a man's shirt.

But this doesn't mean that femininity has been sacrificed. Bow jabots, ruffled jabots and belle bows add the little-girl look to the classic shirt. Further, these bows and jabots are detachable so that a basic tailored shirt can be worn with Bermuda shorts or office wear.

Many of the blouses that stem from the shirt offer big collars and soft detailing along with elegant fabrics. And for the blouses that are completely feminine, there are delicate insertions as well as pleating and tucking.

Most fabrics are lightweight, crease-resistant and quick-drying, requiring very little ironing.

Pleated bib and French cuffs give this salinized cotton shirt a formal look. It's shown modeled with black velvet pants for leisure-time wear on long winter evenings, but is equally suitable and smart to wear at the office.

Canadian statistics report

(A Weekly Review)

Agriculture—The hurricane which hit Annapolis Valley orchards in mid-September cut Canada's 1954 apple crop by an estimated 11%, but the yield is still expected to top last year's by a slight margin. Also expected to better 1953 crops: grapes (by 9%), plums and prunes (by 1%). Harvests are expected to be smaller for peaches (by 15%), pears (by 16%), apricots (by 22%) and cherries (by 9%). Manitoba and Alberta farmers planted fewer acres of vegetables for commercial purposes this year. Alberta acreage is down more than 4% from last year, Manitoba acreage almost 13%.

Food—Over 71% more strawberries were canned, quick-frozen or otherwise processed by commercial packers this year than in 1953, but 7% fewer raspberries were packed. More creamery butter, cheddar cheese, concentrated milk products and margarine were produced this September, but less ice cream and process cheese. Nine-month output was up for all except ice cream. Stocks of almost all dairy and poultry products in cold storage were higher than a year earlier on October 1. More canned beef products were held by manufacturers and wholesalers at the end of August this year, but stocks of canned pork products were down sharply from last year.

Merchandising — Sales of chain grocery and combination food stores were up more than 6% over last year in August, but sales of shoe, drug, hardware, variety and women's clothing were down. Department store sales were off over 5% in the week ending October 2. With farm cash income down 3%, farmers last year spent 5% less on new implements and equipment, slightly more on repair parts than in the preceding year.

Prices — Consumer prices moved lower in seven of 10 regional cities between August 2 and September 1, reductions in food and clothing outweighing higher rents. Lower quotations for live stocks reduced farm prices of agricultural products more than 1% during August.

Foreign Trade—Smaller purchases of iron and steel products, textiles and coal were mainly responsible for the drop of nearly 16% in July imports this year. January-July imports were almost 9% lower than last year, with purchases from the U.S. down 11%.

Labour—Canadian workers earned nearly 3% more than last year in July, a continued decline in labour income in manufacturing being outweighed by increases in other sectors of the economy. The 7-month tally shows an overall gain of almost 2% this year despite reductions in agriculture, fishing, logging, construction and manufacturing.

Britain to make big apple purchase

Great Britain will purchase \$2-430,000 of Canadian apples this winter, and A. K. Loyd, president B.C. Tree Fruits Limited, Kelowna, announced October 7 that a conference between representatives of Canadian fruit producing areas will take place within the near future to allocate apple shipments to the United Kingdom. Price per box has not yet been worked out.

Because Nova Scotia's Annapolis Valley was hit by a hurricane a few weeks ago, coupled with a short crop in Ontario and Quebec, the bulk of the shipments will probably come from the Okanagan Valley. Such shipments would be sent by rail to the Pacific Coast and then by ship via Panama Canal.

Mr. Loyd visited England last July to confer with United Kingdom trade officials regarding possible purchases in B.C. this year. Representatives of the Federal department of trade and commerce and department of agriculture were in England with Mr. Loyd.

In 1907, Finland became the first country to give women the right to vote.

Athletes need protein

We have found that the average athletically active person does not get enough protein and when we have put members of our Testing Groups on a diet high in protein an increase in vigor has been very noticeable. When you get enough protein you feel more vigorous more often, can work harder without getting stale and tired and generally can handle your physical tasks with greater desire and more effectiveness.

We have discovered that the average person gets about 50 to 70 grams of protein per day. Through actual testing we have found that at least twice this amount is needed by an active athlete if physical vigor is going to be sustained at a high level. This means you need to eat about twice as much of the protein foods. Such foods are: meat, fowl, fish, whole grain products and especially the dairy foods such as milk and cheese.

Cheese is an especially good source of protein for people trying to increase their protein intake because it is not only an excellent source of this vital food element but since it is easily digested there is a greater assimilation of protein. Cheese is considered by leading nutrition experts to be one of the most highly concentrated of all protein foods. Experiments have shown that 90 to 99 percent of all cheese is digested. The fact that cheese is so easily digested makes it an ideal source of protein for athletes since ideal digestion is

vital to those eating under stress such as before games. Cheese is also an excellent food to eat after hard activity for the same reason.

We suggest that one sure way to up your protein intake in a simple and effective way is to make a point of having a good serving of cheese every day using it often for snacks and lunches. Certainly cheese is one of the foods that should be a fundamental factor in any training schedule.

Timing gains yards

According to Paul Brown of the Cleveland Browns, one of the greatest football coaches of all time, the reason some ball carriers seem to be able to elude tacklers more efficiently than others, though using the same tricks, is their timing. In other words, the secret is to try your trick at the right time. Brown claims that most ball carriers make their move too soon. He says that a study of the great ball carriers who are hard to stop in the open field shows that they wait until the tackler goes into his tackling stance and they pull their trick. The idea is that the tackler, before he makes his move, usually goes into a crouch just before he launches the tackle. In other words he gets set.

According to Brown this is the

time to change direction, pivot or use whatever trick seems best. The reason is that at this time the tackler will find it hard to recover his balance in time to change the direction of his tackle charge. He will have committed himself.

The Cleveland coach suggests that the player should be constantly watching the opposition to learn just when it is best to start his attempt to avoid the tackle. He says, "Run cool and relaxed with your eyes alert and you'll soon develop the knack of making your move at the right time." He says it is the cool, relaxed and alert ball carrier who is best in the broken field.

Crippled girl learns to write with her head

MONTREAL.—A little crippled girl in a Montreal hospital has learned to write with her head.

A year ago she entered the Shriners' hospital for Crippled Children paralyzed so badly she was unable to use her hands or any of her muscles except those in her neck.

Today, with a specially designed apparatus fitted to her head and with the help of her neck muscles, she can write, paint or draw as she wishes.

The hospital, asking that her name not be divulged, identified the girl only as Mary.

The apparatus, designed for her by a member of the hospital staff, is made of plastic and resembles a telephone operator's headset.

WEEKLY BIBLE COMMENT

GOSPEL OF JOHN SHOWS CHRIST'S HUMANITY

The supreme theme of the Gospel of John is the divinity of Jesus, but the same Gospel, in many instances, incidents and phases emphasizes the humanity of Jesus as well. Jesus Himself stressed this. Jesus described Himself as both eating and drinking, a normal human being who hungered and thirsted, became weary and slept. The divinity of Jesus was not the denial of His humanity, but was the Incarnation, divinity being revealed in and through His human life.

The story of the marriage in Cana of Galilee is an incident in the blending of humanity and divine power. While some will concentrate attention upon the mir-

acle, others will find the chief interest in the fact that Jesus was there.

The miracle of the changing of the water into wine takes its place among all the miracles, which, if they could be explained, would not be miracles at all. But the fact that Jesus was there as a guest, with His disciples, stands out with bold significance.

There also are other incidents that reveal Him in His true humanity, friendly and unconventional, as in the meeting with the Samaritan woman.

We must see Jesus in all the manifold aspects of that amazing earthly life if we would know and understand Him and follow His example in the earnestness of one who said, "I must be about My Father's business."

We must understand the exacting nature of taking up the cross and following Him, but we must never lose the human touch, the gentleness of the Master who blessed little children and rejoiced with those who rejoiced, wept with those who wept.

Home Workshop

These so-called Dutch designs were selected as typical of the wide variety of hearts, flowers, fruits, and hex symbols used by the early Dutch settlers in Pennsylvania. The twelve designs on the pattern are correct size for use in tracing onto cupboard doors, wall panels and other large spaces. There are also designs for small spaces such as chair backs, drawer fronts and box tops. These are all authentic and the pattern gives step by step details for the selection and use of paints. No special skill is needed as all outlines are traced directly to the surface to be decorated. This pattern may be ordered separately at 35c. The number is 262. It is included in the packet of Painting Patterns for Leisure-Time Artists at \$1.50 postpaid.

This crib is easy to make with ordinary household tools and all metal fittings will be found at any hardware store. The pattern gives a list of materials and dimensions for the different parts and a large perspective sketch showing just how the pieces go together. The lamb pattern is taped to thin plywood so that the saw and painting outlines may be traced. Areas of flat color are shown on the pattern in natural gradation of tone to give the lambs a realistic effect when glued to the ends of crib and the nursery walls. Pattern 357 may be ordered for 35c or it will be included in the Small Household Packet of five standard size patterns for \$1.50 postpaid.

Great Britain first used the tank in warfare. 3114

Canadian wartime entertainer finds peacetime shows dull

LONDON.—Winnipeg-born Wally Brennan hankers for the days when he had Canadian servicemen rolling in the aisles of a bombed-out church while shells whistled overhead writes Jeff Ryan, Canadian Press Staff Writer.

Brennan, who has spent more than 30 of his 42 years as a song-and-dance man, finds the peacetime entertainment world a little prosaic by comparison.

"Sometimes we didn't exactly know where the front line was," recalled the pint-sized funnyman in an interview. "But the show always went on. We played in bombed churches, ruined theatres, any place at all."

"We had our own lighting equipment, costumes and everything—we could have put the show on in a shellhole if necessary."

On Vaudeville circuit

These days, the chunky ex-staff sergeant who took his discharge in this country after the Second World War, is playing the routine vaudeville circuit in Britain.

"I'm the guy who always does the wrong thing and is trying to do right," said Brennan of his comedy act. He plays the harmonica and the guitar, writes dialogue and music and can pull off an imitation of James Cagney any time because he looks just like him.

"I don't like doing it," said Brennan, "but people seem to like it." Brennan was picked out by the Canadian Legion in 1942 to carry comedy to the troops. Appointed staff sergeant, he wrote, produced and appeared in the show "Tin Hats" which toured North Africa, Italy, France, Belgium, the Netherlands and Germany.

Wild west show

After the war, he joined Big Bill Campbell, one-time Ottawan who had a popular wild west show until his death in 1952. The all-Canadian cast revives it periodically.

"But nowadays, there's no Canadian service show over here," Brennan said. "The British and American boys have their own shows, but not the Canadians."

Canadian army authorities here have explained that such a show would be costly and that the size of Canada's military contingents in Europe—about 15,000 in all—would not justify such a project.

But Brennan is hopeful that recent developments mean Canadian servicemen in Europe for the next 40 years and there may be something doing.

Seed disinfectant in liquid form eliminates dust

A new seed disinfectant now available to Canadians virtually has eliminated the dust that used to be a necessary accompaniment to the treating of seed grain and forced farmers to wear masks for protection.

The new disinfectant is applied in liquid form and dries on the seed without "dusting off" during the treating operation or later when the seed is bagged and handled.

Seed disinfectants are designed to control seed-borne and soil-borne disease affecting small grains such as wheat, rye, barley, oats and flax. When used according to recommendations, they prevent seed decay and reduce seedling blights caused by destructive organisms at a cost of only a few cents an acre.

The protective chemicals now are available in a variety of forms and strengths: liquid, for use in ready-mix treaters; a standard dry formulation; and the new dustless powder which is dissolved in water and mixed with a special sticking agent to ensure complete coverage of the seed.

The construction of the Brooklyn bridge took almost 13 years.

BRITAIN'S Chris Chataway, usually the pacemaker, has come into his own as a race winner when he set a new world record in the 5,000 meters event between London and Moscow track teams. Chataway who seemed destined to run second in all the world record races in 1954 ran the 5,000 meters in an unbelievable time of 13.51.6. Russia's Vladimir Kuc, who was favoured to win, finished the race a yard behind.

Supersonic guided missile test set for early in 1955

OTTAWA.—Cold weather tests of NIKE, the supersonic anti-aircraft guided missile developed by the United States Army, will be conducted in Canada during January and February, 1955, it was announced by the Department of National Defence here and the U.S. department of Defence in Washington.

Termed Operation "Frost Jet", the tests are designed to determine the effects of extreme low temperature on the complex component parts of the NIKE weapon system. Selected Canadian Army personnel trained at the U.S. Army Guided Missile Centre at Fort Bliss, Texas, during the summer of 1954, will man the NIKE weapon. A limited number of U.S. Army technicians will participate in the operation.

Test firings will take place at an artillery range in the vicinity of Fort Churchill, Man. This proving ground is used jointly by the Canadian and U.S. armies to test new weapons and equipment under extreme Arctic weather and environmental conditions.

The Treaty of Nanking ended the Anglo-Chinese war in 1842. Liberia has an area of 43,000 square miles.

Canada spending 210 million to build 14 new sub chasers

OTTAWA.—Canada is spending \$210,000,000 to construct 14 new sub chasers. Although there have been snags, the first vessel will be completed late in 1955.

Shipbuilding officials in the defence production department admit progress has been "very slow," but add that snags are being overcome. They estimate all of the so-called St. Laurent class of destroyer escort vessels should be delivered to the navy by late 1957.

"We did not encounter any single major problem, but a lot of little problems," one authority said. "We had problems in getting priorities in materials constant changes of design by the navy and all other headaches encountered in designing an entirely new type of vessel."

"Now every one is working desperately to get the lead vessel completed as soon as possible."

Construction started

The lead vessel, named the St. Laurent, is under construction by the Canadian Vickers shipyards at Montreal. Few details of the sub chasers have been made public.

Total cost of the vessels, on which design work started in 1949, now is estimated at \$210,000,000 or

\$15,000,000 each. The ships will be 366 feet long with a displacement of 2,000 tons and each will have a crew of 270 officers and men.

The ships will have longer-range asdic to probe for sub-marines and will have improved armament. Each ship will be equipped with two squids or mortar-type of shell launcher, firing explosion-timed shells over the ship's bow.

Six sub chasers now have been launched, but there still is a lot of work to be done on each before it is completed, including installation of electronic equipment and the superstructure.

Six launched

The six chasers launched and the place of construction: St. Laurent, Vickers; Saguenay, Halifax shipyards; Skeena, Burrard Drydocks, Vancouver; Ottawa, Vickers; Fraser, Yarrow's Ltd., Vancouver; Kootenay, Burrard.

Names of the other eight and place of construction:

Margaree, Halifax shipyards; Assiniboine, Marine Industries, Sorel, Que.; Chaudiere, Halifax; Gatineau, Davie Shipyards, Lauzon, Que.; St. Croix, Marine Industries; Restigouche, Vickers; Terra Nova, Victoria Machinery Depot, Victoria; Columbia, Burrard.

Originally the completion date for some of the ships had been estimated as 1955. Now it is learned that only the first six will be completed by late 1956, with the other eight ready by late 1957.

Quick Canadian Quiz

1. Name the six men who have served as Prime Minister of Canada since 1900.
2. What one industry employs one out of four of all gainfully employed Canadians?
3. Of the Alaska Highway's 1,500-mile length, how much lies within Canada?
4. Of Ottawa's \$4.5 billion tax income this year, how much will come from income taxes paid by individuals?
5. How many of Canada's 3.2 million families receive monthly allowance cheques?

(Answers in another column)

The first iron warships in the world were owned by Mexico in the 1840's.

On The Side • By E. V. Durling

So, young fellow, suppose there's a beautiful female you want to impress. Familiarize yourself with her horoscope. Makes no difference whether or not you believe in astrology. Or if she does. It will give her the idea you are really interested in her. That's the way to handle a proud beauty. Show great interest at first. Then let there be a let-down. Call her up five nights in succession and then skip two nights. She will begin to wonder if her male attracting powers are slipping and will start trying to please you. This is tried and true system. Even works with green-gray eyed blondes.

Robert Louis Stevenson observed: "Absences are good for love—they make it bright and delicate." But what cynical fellow said "absence makes the heart grow fonder of somebody else?" Anyway, the stage pair of Joan Morgan and Scott McKay are inclined to agree with Stevenson. Have decided never to appear in the same play together. Think seeing too much of each other is a strain on the love of husband and wife. They favor some absences. On the other hand, Lynn Fontanne and Alfred Lunt decided always to appear in the same play together. They think absences such as road tours often demanded are not good for love.

A hurricane named Xantippe

The eighth letter was reached in the curious system of naming hurricanes employed by the whimsical weathermen. Thus, this hurricane was called Hazel. Why it wasn't named Helen, I don't know. Maybe the head weatherman's wife is named Helen and she doesn't want any hurricanes named after her. Wonder what the 24th, 25th and 26th hurricanes will be named. For the 25, there is the name Yolanda available. For the 26th, there is Zoe. But how about the 24th? All I can think of is Xantippe.

Planned family of 10

Did you and your charming wife plan to have a certain number of children? How did it work out? Most couples planning a family in advance decide on two children, a boy and a girl. Then they usually get two boys. After that they begin trying for a girl. They end up with six boys and one girl. Or something like that. I know of a couple whose family planning was extremely unusual. They decided they wanted 10 children. That's just the number they now have, seven girls and three boys! In addition to planning the number of children, some mothers try to have their offspring born under certain astrological signs, but that's another item.

Portugal's budget balancer

Are you familiar with the career of Antonio De Oliveira Salazar? If not, I suggest you check on it. This Salazar is a remarkable fellow. Portugal is in an unusual financial situation. It has a balanced budget. In fact, the Portuguese budget has been balanced for over 20 years; Salazar, dictator of Portugal, is responsible for this happy situation. When he balanced the budget it was the first time it had been done in Portugal in 100 years.

Another "do it yourself"

Note it reported that haircuts in some cities will soon be priced at \$2. A fifty-cent tip will undoubtedly be expected. That will bring the cost of a clip up to two bucks and a half. This should increase the sale of those gadgets with which a man can give himself a haircut at home. They are a little difficult to handle but if a fellow's loving wife is willing to help, he can get a pretty good trim on the back and sides.

Funny and Otherwise

"I can't beat that man. He always smiles to himself whenever I say anything silly."

"I know, dear. A sort of perpetual grin."

"Getting married, I hear?"

"Yes, old chap. To the very first girl I fell in love with."

"Well, I congratulate you on your memory."

A fellow had just got back from Hollywood. He had been dazzled by the display of glamour and bigness in the movie colony.

"Everything is done on a tremendous scale," he told friends. "I attended dinner at a producer's home one evening and instead of using finger bowls at the end of the meal all the guests took showers!"

Medic: "Is there any insanity in your family?"

Bill: "Yes, I'm afraid there is. They keep writing me for money."

An actress made a practice of trying to do away with herself because of her complicated affairs of the heart. The fifth time this romantic lady had been rushed to hospital, a well-known columnist offered a word of advice.

"You want to go easy on this suicide stuff," he said kindly. "The first thing you know you'll ruin your health."

"Hey, you! Pull over!" shouted the traffic officer. The lady driver complied, and next day the judge fined her \$25. She went home in great anxiety lest her husband, who always examined her check book, should learn of the incident. Then inspiration struck, and she marked the check stub, "One pullover, \$25."

Helpful Hints

Choose your brush and comb with care. The bristles of your brush should be stiff for vigorous brushing, but not so stiff as to injure the scalp. Wire brushes may tangle long hair and injure the scalp, and should not be used. Your comb should have smooth, blunt-pointed teeth set fairly well apart.

To keep plants watered when going away for several days, place bricks in a tub, set the flower pots on them, and pour in water to cover the bricks. The plants draw moisture from the bricks.

To clean fine lace spread it out on clean white paper and cover it with calcined magnesias; then place another paper over it and place between the leaves of a heavy book; leave three days, then shake out the powder.

ANSWERS TO QUICK QUIZ

5. Just over two million. 3. About 1,200 miles. 1. Laurier, Borden, Meighen, King, Bennett, St. Laurent. 4. Just over one fourth. 2. Manufacturing.

:: APPETIZING RECIPES ::

A different way to use ground beef is in Hamburger Tarts. For dinner serve them hot with mushroom sauce and peas. Then serve them cold for lunch or tuck them in the lunch box.

Hamburger Tarts

Pastry: 2 cups flour, 1 tsp. salt, 2/3 cup lard, 5 tbsps. cold water.

Filling: 1 lb. ground beef, 1/4 cup finely chopped celery, 1/4 cup minced onion, 3 tbsps. minced green pepper, 1/2 tsp. salt, 1/2 tsp. pepper, 1/4 tsp. thyme, 1/2 cup catsup, 1 can cream of mushroom soup, 1/4 cup milk.

Make pastry and roll to 1/8 inch thickness. Cut into eight 5-inch rounds and fit into eight muffin

tins. For the filling, in 2 tbsps. hot fat, cook celery, onion and green pepper for 5 minutes. Push to one side and sear beef. Spoon off excess fat and add seasonings and catsup. Fill pastry cups with meat mixture and fold pastry edges over filling. Bake in a 400 degrees F. oven for 35 to 40 minutes, or until pastry is lightly browned. Garnish with criss-cross strips of pimiento and serve with sauce made by heating the mushroom soup with the milk.

OUR COMPLETE SHORT STORY —

Goodnight, Sweetheart

By JOHNNY ROWLEY

CHARLEY FERRIS had always said "Goodnight sweetheart" to his wife the last thing before going to bed when they were first married. He had continued the practice when he was thirty . . . and when he was forty, and now that he was seventy-three he saw no reason for giving it up.

"Goodnight sweetheart," he murmured, standing in the dusk of the upstairs room in his daughter's home.

He didn't get into bed immediately but went and stood by the window overlooking the garden. It was hot with the heat of late summer after a scorching day and

was only now, at ten o'clock, beginning to cool off. He stood there, absently, drinking in the warm glow of the moon, scarcely thinking, when he caught the murmur of voices from the clump of evergreens around the small summer house.

He didn't mean to eavesdrop but the voices wafted up to him on the cool evening breeze were clear and distinct. He knew at once who was there and frowned.

His granddaughter Dorothy . . . Dot, as she was to the family . . . was almost the image of his wife when they were first married. For that reason he had always thought more of her than his other grandchildren. Only today he had heard that she and Dick Albright were on the verge of breaking up. The news had bothered him for he thought a lot of them both and had been looking forward to the day when they would be married. He had continued to worry about it all day.

His hesitant offer of help had been met with refusal. "It's nothing you can do anything about, Gramps," Dot had told him. "I'll just have to work out of its own accord."

He had had to be content with that but it had continued to worry him. The voices were lower now and he could only catch a word now and then.

He heard Dick say earnestly: "But Dot, if we're to make this thing work out we've got to trust each other." Dot's reply was lost in the night air but the old man had scarcely listened for it.

His mind had gone back almost fifty years. "Did you hear that, Nancy?" he asked. "He says they've got to trust each other." He chuckled. "Remember that time I had to go to Chicago and was a day late in getting back? That was bad enough . . . but when you found the gloves in my valise, the ones I'd forgotten to give you, you thought I was lost for sure. It was a long time before you would trust me completely." He sobered suddenly, coming back to

the present. "They're going through the same thing, Nancy," he said.

They were talking again, earnestly, and had got up and stood now just in front of the summer house where the warm glow of the moon glistened softly on the girl's hair.

She was slim and tall and her hair, tumbling in soft curls was a raven black. "You know I love you," he heard her say. "I guess I always will . . ."

He didn't hear any more for his eyes had filled and he was thinking of another garden in the moonlight and of another girl. "She's the spitten image of you when you were twenty, Nancy," he said. "Do you remember the night I asked you to marry me . . .?" He was lost for a few moments in contemplation. "It was a night like this," he continued finally. He meditated on the scene, his eyes half closed. "It's almost as though it were yesterday," he murmured.

As he watched the boy stepped forward and attempted to take her in his arms. For a moment she protested, but only for a moment, and with a muttered exclamation pressed her face to his.

Again the scene faded for the old man and he was seeing another scene, a scene out of his own past. "Remember that night at Haloran's beach, Nancy?" he whispered. "The night was as cool as this one . . . and the moon shining on the waves made them look all silvery. I took you in my arms . . ." He stared out of the window, his eyes unseeing, looking back into an almost forgotten past.

He shook his head to get rid of the image and looked again into the garden. Dick had hold of both her hands and was talking earnestly. She was looking up into his eyes and in the dim light of the moon he thought he could see a smile on her face.

They stood like that talking for several minutes and then he could see that Dick was about to leave. The fear he had forgotten in his own reminiscing returned with a cold, deadening impact. It seemed that everything must be right, but he couldn't be sure. He strained to catch what they were saying but their tones were lower now.

Then Dick kissed her again. Quickly, the old man thought. He

turned to go and paused when he reached the path which led around to the front of the house. He turned to go and paused when he reached the path which led around to the front of the house. He turned for an instant and for that brief moment the old man could see his face clearly in the moonlight. "Goodnight, sweetheart," he called softly. The moon made silvery ripples on the girl's hair.

Charley Ferris straightened up, a smile on his lips. The fear he had felt all along was gone and in its place an exultation he had felt only once before . . . the night he had proposed to his wife!

"Did you hear that, Nancy?" he demanded. "Everything's all right. The trouble is all patched up." He turned from the window, leaving Dot standing quietly in the moonlight and went to his narrow bed. He paused for an instant before he got in . . . long enough to switch on the light and look at the picture of a dark-haired laughing girl in a high-collared, long-sleeved dress which stood on his bureau.

"Goodnight, sweetheart," he whispered and then turned off the light and sank back against the pillow with a contented sigh. "Goodnight, sweetheart," he murmured once again before his eyes fell shut.

4 Danish Bun Treats from One Basic Dough!

1. Apricot Turnovers

2. Raisin Rounds

3. Jam Strips

4. Cinnamon Braid

For Luscious Variety use New Active Dry Yeast

This rich Danish Bun Dough rewards you with 4 gorgeous treats out of the same oven! Successful risings with Fleischmann's Active Dry Yeast are the secret! So whenever you bake at home, be sure you have Fleischmann's on hand.

Needs No Refrigeration

BASIC DANISH BUN DOUGH

Measure into a small bowl

1 cup lukewarm water
3 teaspoons granulated sugar
and stir until sugar is dissolved.

Sprinkle with contents of

3 envelopes Fleischmann's Active Dry Yeast

Let stand 10 minutes, THEN stir well. Sift together twice, then sift into mixing bowl

6 cups once-sifted bread flour
1/2 cup fine granulated sugar
1 teaspoon salt

Cut in finely

1 pound chilled butter or margarine

Beat together until light and thick

2 eggs
1 egg yolk

and stir into yeast mixture.

Make a well in the flour mixture and pour in yeast mixture; combine thoroughly. Knead dough in the bowl until smooth. Cover dough closely with waxed paper and chill.

Beat together slightly with a fork and beat to finish fancy doughs,

1 egg white
1 tablespoon cold water

Turn out dough on lightly-floured board.

Divide into 4 equal portions and finish as follows:

1. **Apricot Turnovers.** Roll out dough to 9 x 12 inches. Cut into 12 squares; moisten edges. Put spoonful of apricot jam on each square; fold into turnovers; seal; snip tops. Place on greased cookie sheet. Cover. Let rise in warm place 15 mins. Brush with egg-white mixture; sprinkle with chopped almonds and sugar. Bake in moderately hot oven, 375°, 20 mins.

2. **Raisin Rounds.** Cream 2 tbsps. butter; mix in 1/4 cup brown sugar, 1 tsp. flour, 1 tsp. grated lemon rind and 1/2 cup raisins. Roll out dough to 1/4-inch thickness; cut into 2 1/2-inch rounds. Moisten edges of half the rounds with water; place spoonful of raisin mixture on each one; cover with remaining rounds; seal; cut an X in top of each round. Place on greased cookie sheet. Cover. Let rise in warm place 15 minutes. Brush with egg-white mixture; sprinkle with sugar. Bake in moderately hot oven, 375°, 18 to 20 mins. Frost while hot, if desired.

3. **Jam Strips.** Roll out dough to 5 x 15 inches. Run strip of 2 tbsps. thick jam down each side, 1 inch in from edge. Moisten edges and fold over jam to meet in centre; seal. Place on greased cookie sheet. Cover. Let rise in warm place 15 mins. Brush with egg-white mixture; sprinkle with slivered nuts and sugar. Bake in moderately hot oven, 375°, 25 to 30 mins. While hot, spoon thick lemon filling down centre. Drizzle with frosting.

4. **Cinnamon Braid.** Combine 1/2 cup sugar and 1/2 tsp. cinnamon; sprinkle all but 2 teaspoonsful on baking board; place dough on board; roll out to 9 x 14 inches; fold dough over twice. Repeat rolling and folding twice. Roll out dough to 4 x 16 inches; cut into 3 long strips, joined at one end; braid. Place on greased cookie sheet. Cover. Let rise in warm place 15 mins. Brush with egg-white mixture; sprinkle with 2 tbsps. chopped almonds and 2 tbsps. sugar mixture. Bake in moderately hot oven, 375°, 30 mins. Spread hot braid with frosting.

CONFECTIONER'S FROSTING: Combine 1 1/2 cups sifted icing sugar, 2 1/2 tbsps. milk and 1/2 tsp. vanilla.

One of Canada's newest and fastest-growing crops—from the standpoint of spreading production—is the soybean.

In Canada an automobile represents about eight months income for the average industrial worker.

TIMELY TURKEY TOPICS

There is a higher percentage of turkeys marketed through wholesale channels in Alberta than any other Western Province.

Dressing of poultry, particularly turkeys, should not be undertaken on the farm unless adequate equipment is available, and only, with a complete knowledge of requirements and know-how.

For those who do undertake farm dressing of poultry, the following points should be observed in order that poultry may qualify for Canadian Standard grades:

1. Check a sample of the flock and be certain that birds have sufficient fat and flesh for top grades and are free of excessive pin feathers.
2. Starve birds 24 hours before killing with access to clean water to ensure that crop and intestines are empty. Do not market birds with full crops.
3. Do not attempt a semi-scald and secure qualified advice on killing and bleeding technique. Discoloration from improper killing and bleeding accounts for considerable loss on grades in farm dressed poultry.
4. Remove all plumage feathers and all pin feathers protruding through the skin, with particular attention to the hocks and the vent area. Do not market birds with wing fans.
5. Birds should be singed to remove body hairs, with care not to discolor.
6. Feet should be free of extraneous material, and mouth and vents should be flushed.
7. Immediate chilling to an internal body temperature of 40 degrees, or lower, is most essential.

Birds should be hung by the feet for cooling. Do not pile poultry or deliver warm poultry to market, and avoid freezing. Farm dressed poultry exposed to improper temperature conditions develops off-condition and green discoloration and represents a heavy loss to the industry.

8. Particular care should be exercised in handling. Rough handling results in abrasion of the skin with drying and discolora-

tion and a generally shopworn appearance.

Many Canadian unions, such as the Steel Workers' Union, are under American head offices. Thus you find Canadian workers, instructed to impose wage demands which make their products so costly they cannot compete, even in the Canadian market, with American output of the same product.

The number of graduate Canadian nurses emigrating to the United States has increased more than four-fold since the end of the Second World War. In 1953 1,042 nurses moved to the United States.

To boost buying power and investment in home industry, German taxes have been reduced so the top tax payable is 55 per cent. In Canada income tax runs up to 83 per cent.

The Buyers' Hereford cattle graze along the banks of Kneehill Creek at Carbon, on pasture land which once was the Carbon Golf Course. Mr. Buyer points out a nice animal to his son Daunavan.
